GATE 2022 Life Sciences XL
GATE 2022 General Aptitude

## Q. 1 - Q. 5 Carry ONE mark each.

| Q.1 | The movie was funny and I___. |
| :--- | :--- |
| (A) | could help laughing |
| (B) | couldn't help laughed |
| (C) | couldn't help laughing |
| (D) | could helped laughed |

| Q. 2 | $x: y: z=\frac{1}{2}: \frac{1}{3}: \frac{1}{4}$. |
| :--- | :--- |
| What is the value of $\frac{x+z-y}{y} ?$ |  |
| (A) | 0.75 |
| (B) | 1.25 |
| (C) | 2.25 |
| (D) 3.25 |  |

GATE 2022 Life Sciences XL

| Q.3 | Both the numerator and the denominator of $\frac{3}{4}$ are increased by a positive <br> integer, $x$, and those of $\frac{15}{17}$ are decreased by the same integer. This operation <br> results in the same value for both the fractions. <br> What is the value of $x ?$ |
| :--- | :--- |
| (A) | 1 |
| (B) | 2 |
| (C) | 3 |
| (D) | 4 |

| Q. 4 | A survey of 450 students about their subjects of interest resulted in the following outcome. <br> - 150 students are interested in Mathematics. <br> - 200 students are interested in Physics. <br> - 175 students are interested in Chemistry. <br> - 50 students are interested in Mathematics and Physics. <br> - 60 students are interested in Physics and Chemistry. <br> - 40 students are interested in Mathematics and Chemistry. <br> - 30 students are interested in Mathematics, Physics and Chemistry. <br> - Remaining students are interested in Humanities. <br> Based on the above information, the number of students interested in Humanities is |
| :---: | :---: |
| (A) | 10 |
| (B) | 30 |
| (C) | 40 |
| (D) | 45 |

(B)

GATE 2022 Life Sciences XL
Q. 6 - Q. 10 Carry TWO marks each.

| Q.6 | In the last few years, several new shopping malls were opened in the city. The <br> total number of visitors in the malls is impressive. However, the total revenue <br> generated through sales in the shops in these malls is generally low. <br> Which one of the following is the CORRECT logical inference based on the <br> information in the above passage? |
| ---: | :--- |
| (A) | Fewer people are visiting the malls but spending more |
| (B) | More people are visiting the malls but not spending enough |
| (C) | More people are visiting the malls and spending more |
| (D) | Fewer people are visiting the malls and not spending enough |

GATE 2022 Life Sciences XL

| Q. 7 | In a partnership business the monthly investment by three friends for the first <br> six months is in the ratio 3: 4: 5. After six months, they had to increase their <br> monthly investments by $10 \%, 15 \%$ and $20 \%$, respectively, of their initial <br> monthly investment. The new investment ratio was kept constant for the next <br> six months. <br> What is the ratio of their shares in the total profit (in the same order) at the end <br> of the year such that the share is proportional to their individual total investment <br> over the year? |
| :--- | :--- |
| (A) | $22: 23: 24$ |
| (B) | $22: 33: 50$ |
| (C) | $33: 46: 60$ |
| (D) $63: 86: 110$ |  |

GATE 2022 Life Sciences XL

| Q. 8 | Consider the following equations of straight lines: <br> Line L1: $2 x-3 y=5$ <br> Line L2: $3 x+2 y=8$ <br> Line L3: $4 x-6 y=5$ <br> Line L4: $6 x-9 y=6$ <br> Which one among the following is the correct statement? |
| :---: | :---: |
| (A) | L 1 is parallel to L 2 and L 1 is perpendicular to L 3 |
| (B) | L2 is parallel to L4 and L2 is perpendicular to L1 |
| (C) | L3 is perpendicular to L4 and L3 is parallel to L2 |
| (D) | L 4 is perpendicular to L 2 and L 4 is parallel to L 3 |

| Q. 12 | Which among the following has the least second ionization energy? |
| :--- | :--- |
| (A) | Al |
| (B) | Si |
| (C) | P |
| (D) | S |
| Q.13 | Which among the following metal ions has the highest enthalpy of hydration? <br> $($ Assume the given metal ions have the same counter ion.) |
| Given: Atomic numbers of Ti, V, Cr and Mn are 22, 23, 24 and 25, respectively. |  |
| (D) | $\mathrm{Mn}^{2+}$ |
| (A) | $\mathrm{Ti}^{2+}$ |
|  | $\mathrm{Vr}^{2+}$ |

GATE 2022 Life Sciences XL

| Q.14 | Among the following, the one having smallest bond angle is |
| :--- | :--- |
| (A) | $\mathrm{PH}_{3}$ |
| (B) | $\mathrm{PF}_{3}$ |
| (C) | $\mathrm{NF}_{3}$ |
| (D) | $\mathrm{NH}_{3}$ |
| Q.15 | Which of the following is the CORRECT statement about hexoses? |
| (A) | D-mannose is C-4 epimer of D-glucose |
| (B) | D-galactose is C-2 epimer of D-glucose |
| (C) | D-glucose and L-glucose are diastereomers |
| (D) | D-glucose and D-galactose are diastereomers |
|  |  |

GATE 2022 Life Sciences XL

| Q. 16 | The bases present in DNA are |
| :---: | :---: |
| (A) | adenine, cytosine, guanine and thymine |
| (B) | adenine, guanine, thymine and uracil |
| (C) | adenine, cytosine, thymine and uracil |
| (D) | cytosine, guanine, thymine and uracil |
| Q. 17 | The CORRECT order of basicity for the following compounds is <br> I <br> II <br> III |
| (A) | I $>$ II $>$ III |
| (B) | II $>$ III $>$ I |
| (C) | II $>$ I $>$ III |
| (D) | III $>$ I $>$ II |
|  |  |

GATE 2022 Life Sciences XL

| Q. 18 | Molar conductance of monobromoacetic acid at infinite dilution is calculated to be $\boldsymbol{x} \times 10^{-4} \mathrm{~S} \mathrm{~m}^{2} \mathrm{~mol}^{-1}$ at $25^{\circ} \mathrm{C}$. <br> The value of $\boldsymbol{x}$ is (round off to the nearest integer) <br> Given: |
| :---: | :---: |
| (A) | 164 |
| (B) | 195 |
| (C) | 389 |
| (D) | 467 |
| Q. 19 | A sample of benzene, contaminated with a non-volatile and non-ionic solute, boils at $0.31^{\circ} \mathrm{C}$ higher than that of pure benzene. The molality of the solute in the contaminated solution is $\qquad$ (round off to two decimal places). <br> Given: Gas constant $=8.314 \mathrm{~J} \mathrm{~K}^{-1} \mathrm{~mol}^{-1}$ <br> Molecular weight of benzene is $78.11 \mathrm{~g} \mathrm{~mol}^{-1}$ <br> Normal boiling point of benzene is $80.1^{\circ} \mathrm{C}$ <br> Enthalpy of vaporization of benzene is $30.76 \mathrm{~kJ} \mathrm{~mol}^{-1}$ |

GATE 2022 Life Sciences XL
Q. 20 - Q. 27 Carry TWO marks Each

| Q.20 | Among the following statements about cobalt complexes, which is/are CORRECT? <br> Given: Atomic number of Co is 27 |
| :--- | :--- |
|  |  |
| (A) | $\left[\mathrm{Co}\left(\mathrm{NH}_{3}\right)_{4}\right]^{2+}$ exhibits square planar geometry |
| (B) | $\left[\mathrm{Co}(\mathrm{en})_{3}\right]^{3+}$ does not show optical isomerism (en = ethylenediamine) |
| (C) | $\left[\mathrm{Co}\left(\mathrm{H}_{2} \mathrm{O}\right)_{6}\right]^{3+}$ is paramagnetic in nature |
| (D) | $\left.\left[\mathrm{Co}\left(\mathrm{NH}_{3}\right)_{5} \mathrm{Cl}\right)\right]^{2+}$ shows ligand-to-metal charge transfer |
|  |  |

GATE 2022 Life Sciences XL

| Q. 21 | Consider the following reaction: <br> The CORRECT statement(s) related to mono-chlorination at carbon-2 position is/are |
| :---: | :---: |
|  |  |
| (A) | The reaction proceeds through alkyl radical intermediate |
| (B) | Complete inversion of configuration at carbon-2 takes place |
| (C) | Complete retention of configuration at carbon-2 takes place |
| (D) | A mixture of enantiomers is formed |
|  |  |

| Q.22 | Consider the following enzyme catalyzed reaction: <br> where E is enzyme, S is substrate, ES is enzyme-substrate complex and P is <br> product. <br> The CORRECT statement(s) for the above reaction is/are |
| :--- | :--- |
| (A) | Maximum possible rate of product formation is dependent on $k_{2}$ and initial <br> concentration of enzyme. |
| (B) | For a low substrate concentration, the rate of product formation is first order with <br> respect to enzyme and also first order with respect to the substrate. |
| (C) | The rate of product formation is independent of the concentration of enzyme- <br> substrate complex. |
| (D) | For a very high substrate concentration, initial rate of product formation is zero <br> order with respect to the substrate. |
|  |  |

| Q. 23 | Consider the following reaction: <br> The CORRECT pathway(s) involved in the reaction is/are |
| :---: | :---: |
|  |  |
| (A) | E2 followed by isomerization |
| (B) | E1 followed by isomerization |
| (C) | $\mathrm{S}_{\mathrm{N}} 1$ followed by isomerization |
| (D) | Isomerization through carbocation |
| Q. 24 | An aqueous solution of aspirin (HA) is prepared at pH 7.4. The ratio of concentration of $\mathrm{A}^{-}$and HA at equilibrium is $\qquad$ (round off to the nearest integer). <br> Given: $K_{a}$ of aspirin is $3.98 \times 10^{-4}$ |
| Q. 25 | The total number of 3-centre-2-electron bonds in $\mathrm{B}_{4} \mathrm{H}_{10}$ is _____ (in integer). |
|  |  |

| Q. 26 | The equilibrium constant for isomerization of 1-butene to trans-2-butene at $27^{\circ} \mathrm{C}$ is $\qquad$ (round off to one decimal place). <br> Given: Gas constant $=8.314 \mathrm{~J} \mathrm{~K}^{-1} \mathrm{~mol}^{-1}$ <br> $\Delta_{\mathrm{f}} \mathrm{G}^{\circ}$ of 1-butene $=+71.39 \mathrm{~kJ} \mathrm{~mol}^{-1}$ <br> $\Delta_{\mathrm{f}} \mathrm{G}^{\circ}$ of trans-2-butene $=+63.06 \mathrm{~kJ} \mathrm{~mol}^{-1}$ |
| :---: | :---: |
|  |  |
| Q. 27 | A 16 mW monochromatic light emits $4 \times 10^{16}$ photons in 1 second. When this light incidents on a metal strip, photoelectrons are emitted. The wavelength of the emitted photoelectrons (in $\AA$ ) is $\qquad$ (round off to one decimal place). <br> Given: Work function of the metal $=2.0 \mathrm{eV}$ <br> Charge of an electron $=1.6 \times 10^{-19} \mathrm{C}$ <br> Mass of an electron $=9.1 \times 10^{-31} \mathrm{~kg}$ <br> Planck's constant $=6.626 \times 10^{-34} \mathrm{~J} \mathrm{~s}$ |
|  |  |

Biochemistry XL (Q): Q. 28 - Q. 35 Carry ONE mark Each
\(\left.\begin{array}{|l|l|}\hline Q.28 \& Which of the immune cells listed below are agranular? <br>
P. Eosinophils <br>
Q. Mast cells <br>
R. Monocytes <br>

S. T-cells\end{array}\right\}\)| (A) | P and Q only |
| :--- | :--- |
| (B) | Q and R only |
| (C) | R and S only |
| (D) | S and P only |
| Q.29 | Which one of the following enzymes is located in the outer mitochondrial <br> membrane? |
| (A) | Citrate synthase |
| (B) | Fumarase |
| (D) | Succinate dehydrogenase |

GATE 2022 Life Sciences XL

| Q. 30 | Which one of the following statements about the DNA polymerase III of E. coli is NOT correct? |
| :---: | :---: |
| (A) | It catalyzes nick translation. |
| (B) | Its absence is lethal to E. coli. |
| (C) | It synthesizes a complementary DNA strand using a single-stranded template. |
| (D) | It possesses $3^{\prime} \rightarrow 5^{\prime}$ exonuclease activity. |
| Q. 31 | Which one of the following compounds is NOT a translation inhibitor? |
| (A) | Chloramphenicol |
| (B) | Cycloheximide |
| (C) | Puromycin |
| (D) | Rifampicin |
| Q. 32 | A dye was allowed to undergo migration on a chromatographic paper using a solvent. The dye, and the solvent-front migrated 5 and 20 cm , respectively, from the point of origin. The retention factor (rounded off to two places of decimals) for the dye is $\qquad$ . |
| Q. 33 | The $p K_{a}$ values of the carboxylic and amino groups of an amino acid with a non-ionizable side chain are 2.17 and 9.13 , respectively. The isoelectric point (rounded off to two places of decimals) of this amino acid is $\qquad$ . |

GATE 2022 Life Sciences XL

| Q.34 | The number of ATP molecules required for the complete assimilation of one <br> molecule of $\mathrm{CO}_{2}$ in Calvin cycle is |
| :--- | :--- |
| Q. 35 | The absorbance of a $5 \times 10^{-4} M$ solution of tyrosine at 280 nm wavelength is <br> 0.75. The path length of the cuvette is 1 cm. The molar absorption coefficient at <br> the given wavelength in $M^{-1} \mathrm{~cm}^{-1}$, correct to the nearest integer, is |
|  |  |

GATE 2022 Life Sciences XL
Q. 36 - Q. 46 Carry TWO marks Each

| Q. 36 | Filamentous photosynthetic algae were placed on a microscopic slide and illuminated with light of different colors as illustrated. <br> The bacteria that are known to migrate towards the region of high $O_{2}$ were also added uniformly on the slide. Which one of the following options illustrates the distribution of bacteria along the length of the microscopic slide after illumination? |
| :---: | :---: |
| (A) |  |
| (B) |  |
| (C) |  |
| (D) |  |

GATE 2022 Life Sciences XL

| Q. 37 | Two RNAs shown below were used separately as templates in an in vitro translation system, which can generate proteins in all possible reading frames. $\begin{array}{ll} R N A_{1}: & 5^{\prime}-(A G)_{n}-3^{\prime} \\ R N A_{2}: & 5^{\prime}-(A A G)_{n}-3^{\prime} \end{array}$ <br> The $R N A_{1}$ translated product contained Arg and Glu. <br> The $R N A_{2}$ translated product contained Arg, Glu, and Lys. <br> Which one of the following codons directs the incorporation of Arg? |
| :---: | :---: |
| (A) | AAG |
| (B) | AGA |
| (C) | GAA |
| (D) | GAG |
| Q. 38 | Which of the following statements about endogenous synthesis of insulin are correct? <br> P. Insulin is synthesized as preproinsulin. <br> Q. Preproinsulin is converted to proinsulin. <br> R. Single-site cleavage of proinsulin eliminates $C$ chain. <br> S. Mature insulin consists of disulphide-linked A and B chains. |
| (A) | $\mathrm{P}, \mathrm{Q}$, and R |
| (B) | P, Q, and S |
| (C) | P, R, and S |
| (D) | Q, R, and S |

GATE 2022 Life Sciences XL

| Q.39 | Which one of the following enzymes converts testosterone to estradiol? |
| :--- | :--- |
| (A) | Aromatase |
| (B) | $3 \beta$-hydroxysteroid dehydrogenase |
| (C) | $5 \alpha$-reductase |
| (D) | $17 \beta$-hydroxysteroid dehydrogenase |
| Q.40 | Purification of $6 \times$ His-tagged protein using Ni-NTA column is an example <br> of <br> (A) |
| affinity chromatography |  |
| (B) | hydrophobic-interaction chromatography |
| (C) | ion-exchange chromatography |
| (D) | Maltose |
| (D) | size-exclusion chromatography |
| (B) | Cellulose |
| Chitin |  |
|  | Lactose |

GATE 2022 Life Sciences XL

| Q. 42 | Which of the following statements about IgA is/are correct? |
| :---: | :---: |
| (A) | It is secreted into colostrum. |
| (B) | It is transported across the cell by transcytosis. |
| (C) | Its secretion is facilitated by poly-Ig receptor. |
| (D) | It primarily exists as a dimer in serum. |
|  |  |
|  |  |
| Q. 43 | The standard free energy changes for conversion of phosphoenol pyruvate (PEP) to pyruvate, and ATP synthesis are shown below. $\begin{array}{ll} P E P+\mathrm{H}_{2} \mathrm{O} \rightleftharpoons \text { pyruvate }+P_{i} & \Delta G^{\prime o}=-61.9 \mathrm{~kJ} \cdot \mathrm{~mol}^{-1} \\ A D P+P_{i} \rightleftharpoons A T P+\mathrm{H}_{2} \mathrm{O} & \Delta G^{\prime o}=30.5 \mathrm{~kJ} \cdot \mathrm{~mol}^{-1} \end{array}$ <br> The starting concentrations of $P E P, A D P$, pyruvate, and ATP are 25, 25, 50, and 50 mM , respectively. The value of universal gas constant $(R)$ is $8.315 \mathrm{~J} \cdot \mathrm{~mol}^{-1} \mathrm{~K}^{-1}$. The actual free energy change in $\mathrm{kJ} \cdot \mathrm{mol}^{-1}$ for the reaction $P E P+A D P \rightarrow \text { pyruvate }+ \text { ATP }$ <br> carried out at $37^{\circ} \mathrm{C}$ will be $\qquad$ (rounded off to one place of decimal). |
|  |  |
|  |  |
| Q. 44 | The dissociation constant for a receptor-ligand pair is $0.25 \times 10^{-7} \mathrm{M}$. The ligand was added to a solution of the receptor such that the receptor was $50 \%$ saturated at equilibrium. Assume that the receptor has one ligand binding site. The concentration of the free ligand at equilibrium in $n M$, correct to the nearest integer, should be $\qquad$ . |
|  |  |

GATE 2022 Life Sciences XL

| Q.45 | The half-maximal velocity of an enzyme catalyzed reaction was found at a <br> substrate concentration of $0.5 \times 10^{-6} \mathrm{M}$. This enzyme follows Michaelis-Menten <br> kinetics. In the presence of a competitive inhibitor, the half-maximal velocity was <br> found at a substrate concentration of $1.5 \times 10^{-6} \mathrm{M}$. Given that the enzyme- <br> inhibitor pair has a dissociation constant of $2 \times 10^{-7} \mathrm{M}$, the concentration of the <br> competitive inhibitor in $\mu M$, rounded off to one place of decimal, was___. |
| :--- | :--- |
|  |  |
| Q.46 | A forty-times diluted sample of ssRNA gave an $A_{260}$ of 0.01. The concentration <br> of the ssRNA before the dilution in $\mu g / m L$ was (correct to the nearest <br> integer $).$ |
|  |  |

GATE 2022 Life Sciences XL

| Q.72 | Which of the following methods are used for the identification of <br> microorganisms? |
| :--- | :--- |
| (A) | Nucleic acid hybridization |
| (B) | Southern blotting |
| (C) | 16s rRNA sequencing |
| (D) | Percentage G-C content |
| Q.73 | Which of the following are present in Gram-negative bacteria? |
| (A) | Lipopolysaccharide |
| (B) | Teichoic acid |
| (C) | Periplasm |
| (D) | Endotoxin |
|  |  |
|  |  |

GATE 2022 Life Sciences XL

| Q.80 | Which of the following Gram-positive cocci are found in biofilm of dental <br> plaque? |
| :--- | :--- |
| (A) | Gonococcus |
| (B) | Streptococcus mutans |
| (C) | Streptococcus sobrinus |
| (D) | Fusobacterium species |
| Q.81 | Which of the following statements are TRUE for archaea? |
| (A) | Cell wall in archaea contains muramic acid and D-amino acid |
| (B) | N-Formylmethionine is the first amino acid to initiate new polypeptide chain <br> synthesis in archaea |
| (C) | Methionine is the first amino acid used during protein synthesis in archaea |
| (D) | Membrane of archaea contains phytanyl rather than fatty acids |
|  |  |
|  |  |

GATE 2022 Life Sciences XL

GATE 2022 Life Sciences XL

## Zoology (XL-T) Q. 85 - Q. 92 Carry ONE mark each

| Q.85 | Which one of the following organic compounds is composed of only (i) a nitrogen <br> containing base, (ii) a single five-carbon sugar, and (iii) a triphosphate? |
| :--- | :--- |
| (A) | Nucleoside |
| (B) | Nucleotide |
| (C) | Base |
| (D) | Nucleic acid |

| Q.86 | Which one of the following animals develops adaptive predator avoidance <br> morphology because of the presence of high predator number in its habitat? |
| :--- | :--- |
| (A) | Daphnia sp. |
| (B) | Scaphiopus $s p$. |
| (C) | Wolbachia $s p$. |
| (D) | Rhodnius $s p$. |

GATE 2022 Life Sciences XL

| Q. 87 | To which class of Drosophila developmental genes does fushi tarazu (ftz) belong? |
| :--- | :--- |
| (A) | Gap genes |
| (B) | Segment polarity genes |
| (C) | Pair rule genes |
| (D) | Maternal effect genes |

| Q. 88 | The action of which class of enzyme inhibitors can be reversed by adding an excess <br> of substrate? |
| :--- | :--- |
| (A) | Uncompetitive inhibitors |
| (B) | Competitive inhibitors |
| (C) | Non-specific inhibitors |
| (D) | Allosteric inhibitors |

GATE 2022 Life Sciences XL

| Q.89 | Mendel deduced the genetic principle of inheritance by experimenting on sweet pea <br> plants. One of the experiments involved crossing plants with two contrasting <br> characters, tall (dominant) and dwarf(recessive), which yielded all tall plants in the <br> first generation. When the same genetic cross was independently repeated by a <br> researcher, only short plants were obtained. Which one of the following can <br> possibly explain the altered outcome? |
| :--- | :--- |
| (A) | Tall plants were heterozygous |
| (B) | An enhancer for the tall allele is present in the dwarf plant |
| (C) | A suppressor for the tall allele is present in the dwarf plant |
| (D) | Dwarf plants are homozygous |

## Q. 90 - Q. 92 Multiple Select Question (MSQ) carry ONE mark each (no negative marks)

| Q. 90 | Which of the following is/are responsible for reversible receptor-ligand <br> interaction? |
| :--- | :--- |
| (A) | Ionic interactions |
| (B) | Hydrogen bonding |
| (C) | Peptide bonding |
| (D) | Hydrophobic interactions |

GATE 2022 Life Sciences XL

| Q.91 | In the human body, which of the following is/are involved in processing of a foreign <br> antigen? |
| :--- | :--- |
| (A) | B-cells |
| (B) | Macrophages |
| (C) | Red blood cells |
| (D) | Platelets |

| Q.92 | Animals can be classified as 'specialists' or 'generalists' with respect to diet and <br> habitat selection. Which of the following organism/s belong/s to the specialist <br> category? |
| :--- | :--- |
| (A) | Raccoon |
| (B) | Panda |
| (C) | Polar Bear |
| (D) | Koala Bear |

GATE 2022 Life Sciences XL
Q. 93 - Q. 103 Multiple Choice Questions (MCQ) carry TWO marks each (for each wrong answer: - 2/3)

| Q.93 | Match the drug/chemicals listed in Column I with the developmental/physiological <br> defects listed in Column II. <br> Column I | P. Veratrum alkaloids <br> Q. Thalidomide <br> R. Methylmercury <br> S. Diethylstilbesterol |
| :--- | :--- | :--- |
| (A) | P-(iii); Q-(iv); R-(ii); S-(i) | (i) Obesity <br> (ii) Minamata syndrome <br> (iii) Cyclopia <br> (iv) Phocomelia |
| (B) | P-(i); Q-(iv), R-(iii), S-(ii) |  |

GATE 2022 Life Sciences XL
Q. 98 - Q. 100 Multiple Select Questions (MSQ) carry TWO marks each (no negative marks)

| Q.98 | 2-Deoxyglucose (2-DG) inhibits the proliferation of cells and hence finds use as an <br> anti-cancer agent. It is also used in COVID therapy, where it blocks <br> hyperproliferation of virus-infected cells. Mechanistically, 2-DG blocks glycolysis <br> by inhibiting the activities of which of the following enzyme/s? |
| :--- | :--- |
| (A) | Hexokinase |
| (B) | Glucose 6-phosphate isomerase |
| (C) | Glucose-6 phosphate dehydrogenase |
| (D) | Phosphofructokinase |

| Q.99 | According to Abbe's equation on microscopy, the ability to resolve two entities <br> inside a cell by light microscopy depends on which of the following factor/s? |
| :--- | :--- |
| (A) | Magnification of the objective lens |
| (B) | Intensity of incident light |
| (C) | Wavelength |
| (D) | Numerical aperture of the objective lens |

GATE 2022 Life Sciences XL

| Q. 100 | Match the animal inactivity behaviors listed in Column I with representative animals in Column II and their definitions listed in Column III. |  |  |
| :---: | :---: | :---: | :---: |
|  | Column I | Column II | Column III |
|  | P. Torpor | (i) Australian burrowing frogs | a. Prolonged period of inactivity without reducing body temperature |
|  | Q. Hibernation | (ii) Polar Bears | b. Inactivity period which accompanies extended periods of dryness |
|  | R. Winter sleep | (iii) Ground Squirrels | c. Decreased metabolism with lowered body temperature occurring in daily activity cycles |
|  | S. Aestivation | (iv) Hummingbirds | d. Decreased metabolism and lower body temperature for weeks or months |
| (A) | P-(ii)-c, Q-(iv)-b, R-(i)-a, S-(iii)-d |  |  |
| (B) | P-(iv)-c, Q-(iii)-d, R-(ii)-a, S-(i)-b |  |  |
| (C) | P-(iv)-c, Q-(ii)-b, R-(i)-a, S-(iii)-d |  |  |
| (D) | P-(iv)-b, Q-(i)-c, R-(ii)-d, S-(iii)-a |  |  |
|  |  |  |  |

GATE 2022 Life Sciences XL
Q. 101 - Q. 103 Numerical Answer Type (NAT), carry TWO marks each (no negative marks).

| Q.101 | If the vital capacity (VC) of an individual is 4900 ml , the tidal volume (TV) is <br> 500 ml , and the inspiratory reserve volume (IRV) is 3300 ml , the expiratory reserve <br> volume (ERV) of the individual is___ml. (in integer). |
| :--- | :--- |
|  |  |

| Q.102 | A typical food chain involves producers, herbivores, primary carnivores and <br> secondary carnivores. Based on Lindeman's law of trophic efficiency, if producers <br> have 40 kJ of energy, the energy that will be stored in secondary carnivores <br> is_ kJ. (round off to two decimal places) |
| :--- | :--- |
|  |  |

| Q. 103 | The average body length of Drosophila nasuta collected from Andaman and <br> Nicobar Islands is 2 mm. From this population, a few males and females having a <br> body length of 3 mm were selected and interbred. The average body length of the <br> resultant progeny was 2.5 mm. The heritability ( $\mathrm{h}^{2}$ ) of the body length in this <br> population is _ (round off to one decimal place) |
| :--- | :--- |
|  |  |

| :--- | :--- |
| Q.106 | The lowest water activity (aw $)$ supporting the growth of Staphylococcus aureus in <br> food under aerobic condition is |
| (A) | 0.98 |
| (B) | 0.91 |
| (C) | 0.89 |
| (D) | 0.86 |
| Q.107 | Cultures used in industrial production of yogurt are |
| (A) | Lactococcus lactis subsp. lactis |
| (B) | Streptococcus thermophilus |
| (C) | Leuconostoc mesenteroides subsp. cremoris |
| (D) | Lactobacillus delbrueckii subsp. bulgaricus |
|  |  |

GATE 2022 Life Sciences XL

| Q. 108 | In a dairy plant, spray drying technology is used to produce whey powder. The rate of spray drying depends on |
| :---: | :---: |
| (A) | Temperature of the incoming air |
| (B) | Shape of the cyclone separator |
| (C) | Diameter of the whey droplet |
| (D) | Heat transfer coefficient of hot air |
| Q. 109 | The parboiling of paddy results into |
| (A) | Increase in the milling losses |
| (B) | Increase in the nutritional value of rice |
| (C) | Increase in the head rice recovery |
| (D) | Increase in the broken rice percentage |
| Q. 110 | One hundred kg paddy is dried from $18 \%$ wet basis to $13 \%$ wet basis moisture content. The amount of water removed (in kg ) from the paddy is $\qquad$ (round off to one decimal place). |
| Q. 111 | In a canning industry, the total process time $\left(\mathrm{F}_{0}\right)$ was calculated as 3 min . If each can contains 20 spores having decimal reduction time of 1.6 min , the probability of spoilage would be $\qquad$ in 100 cans (round off to the nearest integer). |

## Q. 112 - Q. 122 Carry TWO marks Each

GATE 2022 Life Sciences XL

| Q. 113 | Make the correct pair of food packaging technology given in Column I with operating principle or description in Column II. |  |
| :---: | :---: | :---: |
|  | Column I | Column II |
|  | P. Aseptic packaging | 1. Control of the concentration of $\mathrm{O}_{2}$ and $\mathrm{CO}_{2}$ inside the package |
|  | Q. Active packaging | 2. Create a skin tight package wall |
|  | R. Modified atmosphere packaging | 3. Independent sterilization of food and packaging material and packaging under sterile environment |
|  | S. Vacuum packaging | 4. Makes non-passive contribution to product development |
| (A) | P-3, Q-4, R-1, S-2 |  |
| (B) | P-3, Q-2, R-1, S-4 |  |
| (C) | P-1, Q-4, R-3, S-2 |  |

GATE 2022 Life Sciences XL

| Q.116 | Most commonly used refrigerant in direct immersion freezing of food is |
| :--- | :--- |
| (A) | Monochlorodifluoromethane |
| (B) | Dichlorodifluoromethane |
| (C) | Liquid nitrogen |
| (D) | Freon |
| Q.117 | Which among the following are $\omega$-6 poly unsaturated essential fatty acids? |
| (A) | $18: 2$ Linoleic acid |
| (B) | $18: 3 \alpha$-Linolenic acid |
| (C) | $18: 3 \gamma$-Linolenic acid |
| (D) | The peptide bonds are broken |
| (D) | $20: 4$ Arachidonic acid |
| (A) | There may be an increase in $\alpha$-helix and $\beta$-sheet structure |
| It is an irreversible process |  |
| Which among the following statements are true with respect to protein |  |
| denaturation? |  |

GATE 2022 Life Sciences XL

| Q.119 | Identify the correct pair(s) of milling equipment and the grain for which it is used. |
| :--- | :--- |
| (A) | Mist polisher-Rice |
| (B) | Break roll-Wheat |
| (C) | Rubber roll-Pigeon pea |
| (D) | Beall degermer-Maize |
| Q.120 | Which among the following expression(s) is/are correct? |
| (A) | Reynolds number $=\frac{\text { Density } \times \text { Velocity } \times \text { Characteristic dimension }}{\text { Viscosity }}$ |
| (B) | Nusselt number $=\frac{\text { Convective heat transfer coefficient } \times \text { Characteristic dimension }}{\text { Thermal conductivity of solid }}$ |
| (C) | Schmidt number $=\frac{\text { Kinematic viscosity of fluid }}{\text { Diffusivity }}$ |
| (D) | Biot number $=\frac{\text { Convective heat transfer coefficient } \times \text { Characteristic dimension }}{\text { Thermal conductivity of fluid }}$ |

GATE 2022 Life Sciences XL

|  |  |
| :---: | :---: |
| Q. 121 | In a dairy processing plant, milk enters a 30 m long and 2 cm diameter tube at $60^{\circ} \mathrm{C}$ and leaves at $57^{\circ} \mathrm{C}$. The total heat loss over the tube length is 381.15 W . The specific heat capacity, density, and viscosity of milk are $3.85 \mathrm{~kJ} \mathrm{~kg}^{-1} \mathrm{~K}^{-1}$, $1020 \mathrm{~kg} \mathrm{~m}^{-3}$, and 1.20 cP , respectively. The Reynolds number for the flow is $\qquad$ (round off to the nearest integer). <br> Given: $\pi=3.14$ |
|  |  |
|  |  |
|  |  |
| Q. 122 | The dry bulb temperature and relative humidity of air inside a storage chamber are $37^{\circ} \mathrm{C}$ and $50 \%$, respectively. The saturation pressure of water vapour at $37^{\circ} \mathrm{C}$ and barometric pressure are 6.28 kPa and 101.32 kPa , respectively. The humidity ratio of air inside the chamber is $\qquad$ kg water (kg dry air) ${ }^{-1}$ (round off to three decimal places). <br> Given: Molecular weight of water vapour and dry air are $18.02 \mathrm{~g} \mathrm{~mol}^{-1}$ and $28.97 \mathrm{~g} \mathrm{~mol}^{-1}$, respectively. |
